

SAFETY PROTOCOL FOR COVID-19

During this time, we are trying to provide services to our clients while keeping their safety and the safety of our clinicians in mind. Below is our new safety protocol for our office.

- Clients will remain in their vehicles until their appointment time. We will call/text you when it is time for you to come inside.
- For parents with children, we ask that you wait inside your vehicle while your child is having their appointment. We will escort them out once the session is over.
- Protective gear (gloves) will be offered and required for all clients coming into the office. Our clinicians will also be wearing face masks and gloves.
- Hand sanitizer will be used before and after sessions.
- Our office will be properly cleaned and sanitized each day.
