Quanetta S. Jefferson MA, LPC

Sara Anderson MS, LPC

At A New Tomorrow, telehealth services are used when a client is not able to be on site for a number of reasons. While you may not plan to engage in telehealth services at this time, we request that you watch the telehealth step by step video on our website in order to be prepared if an emergent situation occurs and telehealth becomes necessary. The video will walk you through how to access the session and use the features of our platform. This video is required for all clients to engage in telehealth services.

I, _____ acknowledge that I have watched the telehealth step by step video and understand the contents of it.
